Electric lights & Extensions and suburban villages of the Bangalore City

From

The President, Bangalore City Municipal Council

No. 149 Dated 30.11.07 Received 3.12.1907

Diary No 3728 | Enclos 2 | Spare Copies. — | Serial No 1

BRIEF ABSTRACT OF LETTER.

Points out the necessity for the extension of Electric lighting to the two Extensions and suburban villages of the City except Sunnievaddipalyam and submits a Copy of the municipal Council's resolution agreeing to pay an additional sum of Rs 5000/- annually for the purpose instead of Rs 7000/- paid by the Special Committee.

NOTES AND ORDERS

The previous references on the subject are submitted. The President's memo contains the facts of the case. Submitted for orders

Nothing 2 Now that the Municipal Council is agreeable to pay.—

At present, there are 881 lights in the city, & the Municipality pay for them Rs 15,000 or Rs 17 41 per lamp Payment at this rate for the additional lights required will be Rs 8,954 per annum while the Municipality offer only Rs 5,000 The Cant & Subsidiary Station pays a little over Rs 28 per light & even then the blue print map (herewith returned) shows in red marks the places at which additional lights are absolutely necessary, as approved by the President of the City Municipality

II In this connection I put up Copy of a letter by the Ch Elec. Engineer (Ch 1322 of 24th ult) giving, as far as he is able to do so, particulars of the Capital Cost & maintenance Charges of the Bangalore City lighting. It is evident from these figures that unless the Municipality are made to pay more than they offer for the lighting Govt will lose money.

Serial No.

From the statement prepared by Mr. Gibbs, received with Chief Engineer's letter dated 23rd May 1908, it is seen that even charging the whole cost of the transmission line and of the whole of the Fort works to the City (instead of to the City and Civil and Military Station jointly), the City pays 3.85 per cent. If the City is charged with its proper share of the capital cost of transmission line &c., the income would be over 4 per cent.

In these circumstances, I think the offer of the Municipal Council to pay Rs.20,000 (against Rs.23,000 suggested by the Comptroller and Chief Engineer), if accepted, is not likely to cause any serious loss to the Electrical Department of Government. It may be noted that the Civil and Military Station Municipality pays only Rs.25,000.

The offer of the City Municipality may, I think, be accepted.

PB—1000—8-10-07

Letter No. 1322 dt 24th April 1908 from the Chief Electrical Engineer to the Chief Engineer of Mysore.

In accordance with your unofficial no. dt/- I have the honor to herewith resubmit financial statement for Bangalore lighting & power service based on complete Capital accounts & revised Estimates & the energy consumption and revenue for the month of January -

Bangalore City Capital

On this basis, the Capital against the Bangalore City work is as follows -

Transmission Line . Rs	3,20,568
Bangalore city works	3,52,108
Total.	672,676

For purpose of depreciation, this may be classified as follows -

Transmission Line

Poles & wire depreciable @ 2½ %		2,13,512
Other material	- 5 %	50,773
Not- depreciable - - - - -		56,283
		320,568

Bangalore City Works

Plant- depreciable @ 5 %		191.267
Building Line works &c @ 2½ %		103146
Not- depreciable		57697
		352 108

Bangalore C T M Station Capital

The Capital account amounts to Rs 2,97,412/- which for purposes of depreciation may be classified as follows. —

Plant	depreciable @ 5%	1,19,421
Line Work & Buildings	" 2½%	1,29,282
Non-depreciable		48,709
		2,97,412

Energy Consumption

We find from our records that approximately 268038 units of Electrical power were received in Bangalore during the month of January

Generation Cost

I find that our generating cost at Sivasamudram for power delivered to transmission lines during the month of January including interest @ 5% together with depreciation charges was .011 annas per unit, as a fair price for Sivasamudram & charge to other works is .125 annas per unit.

Line loss

Owing to losses in transmission the power supplied to Bangalore line will be 10% greater than that recorded at Bangalore, therefore Bangalore City would pay for approximately 294800 units. 294800 × .125 = Rs 2297

Cost per unit Received

The cost then per unit received at Bangalore will be $\frac{268038}{229716}$ = 137 annas per unit exclusive of transmission Costs

Transmission Costs

Interest depreciation - 3 main Boiler Charges

transmission line add. 14 annas per unit.

Cost per unit at Bangalore

The cost per unit received in Bangalore at the Sub-Station therefore is 137 + 14 = .277 annas

Operation & Maintenance Costs Bangalore City

Interest, depreciation & operation in the City on 201435 units is 27 annas, so that the total Cost for power delivered in the city is .277 + .27 = .547 annas per unit.

Cantonment Load

The consumption for the month in the Civil & Military Station was 66603 units

Power to C & M Station

A fair price to the C & M Station would have been .30 annas

Cost of Current delivered by C & M Stations

The interest, depreciation and operating charges added .74 annas per unit to cost of power.

Net result

Power cost the City Rupees 6886, and the revenue was 6154 showing a loss of 732.

Power cost the C & M Rupees 4329 and the revenue was 2158 showing a further loss of 2171 or a total loss of 2903 rupees for the month.

General

The above Showing will be Considered

Vanyne but- I trust as a favour
you will not- ask for our Statement until we have our accountants

Copy

Reg. No. 167 of [illegible]

Decr
Letter dtd 8th April 1908
3 pages

ELECTRICAL BRANCH.

Dated: 26th April [illegible]

To

The Chief Engineer of Jayore.

Sir,

In accordance with your memorandum No.[illegible] I have the honour to herewith re-submit Financial statement for Bangalore Ignition and Power service passed on completed capital according to revised Estimates and the sanctioned and recovering for Lighting and Power as follows:-

DAILY CAPITAL.

On this basis the capital against the Bangalore City work is as follows:-

Bangalore City Mains	3,83,108
Transmission Line	2,20,888
Total	6,12,896

"By Purpose of Government" this may be classified as follows:-

TRANSMISSION LINE.

Poles & wire depreciable @ 3½%	2,12,372
Other masonry " " 6%	80,772
Not depreciable	26,289
	3,20,889

DANGERFORD CITY MAINS.

Plant depreciable @ 6%	1,01,267
Building Line & work &c. @ 3½%	1,03,144
Not depreciable	37,681
	3,42,092

BANGALORE C. & M. STATION CAPITAL.

This capital account amounts to Rs.2,97,412/-, which for purposes of depreciation may be classified as follows:-

Plant	depreciable @	5%	1,19,421
Line Work & Buildings	"	" 2½%	1,29,282
Not depreciable			48,709
			2,97,412

ENERGY CONSUMPTION.

We find from our records that approximately 268038 units of electrical power were received in Bangalore during the month of January.

GENERATION COST.

I find that our generating cost at Sivasamudram for power delivered to transmission lines during the month of January including interest @ 5% together with depreciation charges was .11 anna per unit, so a fair price for Sivasamudram to charge to other works is .125 anna per unit.

LINE LOSS.

Owing to losses in transmission, the power supplied to Bangalore line will be 10% greater than that recorded at Bangalore, therefore Bangalore City would pay for approximately 294000 units. 294000 X .125 = Rs.3297.

COST PER UNIT RECEIVED.

The cost then per unit received at Bangalore will be $\frac{268038}{2397 \times 16} = .137$ anna per unit exclusive of transmission cost.

TRANSMISSION COSTS.

Interest, depreciation and maintenance charges on

transmission line add .14 anna per unit.

COST PER UNIT AT BANGALORE.

The cost per unit received in Bangalore at the Fort Station therefore is .137 + .14 = .277 anna.

OPERATION & MAINTENANCE COSTS BANGALORE CITY.

Interest, depreciation and operation in the City on 201435 units is .27 anna, so that the total cost for power delivered in the City is .277 + .27 = .547 anna per unit.

CANTONMENT WORK.

The consumption for the month in the Civil & Military Station was 66603 units.

PRICE TO C. & M. STATION.

A fair price to the C. & M. Station would have been .30 anna.

COST OF CURRENT DELIVERED BY C. & M. STATION.

The interest, depreciation and operating charges added .74 anna per unit to cost of power.

NET RESULT.

Power cost the City Works 6886, and the revenue was 6154 showing a loss of 732.

Power cost the C. & M. Works 4839 and the revenue was 2158 showing a further loss of 2171 [illegible] Rupees for the month.

GENERAL.

The above showing will be constantly varying but I trust

trust as a favour you will not ask for another statement until we have an accountant.

I have the honour to be,

Sir,

Your most obedient servant,

M.I.E.E. M.I.E.E.

Chief Electrical Engineer,

to the Govt. of Mysore.

From

THE CHIEF ELECTRICAL ENGINEER,
to the GOVERNMENT OF MYSORE

To

THE CHIEF ENGINEER of MYSORE,
BANGALORE.

Sir,

COMPTROLLER, P.W.& Ry.BRANCH

I have the honour to return herewith a statement showing the results of our Bangalore Electrical supply business on the lines required by Mr.Madhava Rao except that I have not divided the transmission line capital between the two Municipalities. My reason for not doing so is that such a method requires that we should also sub-divide the capital cost of the Fort Station and becomes very complicated while the method adopted is simple and effective resulting in a good fair showing.

If any further information is required or explanation wanted I respectfully request the favour of a personal conference.

Regarding the last para of Mr.Madhava Rao's letter of 14th May'08, would say that the cost of power received in the Bangalore City Station is .277 anna per unit so the sale to Binny's at .45 anna is quite profitable as it involves very little capital expenditure.

Y

It is extremely difficult to arrive at more than approximate figures owing to our not having such an arrangement for accounting as is requisite. If our accounts could be adjusted on a definite basis this sort of information would be always ready and afford a good system of check on general management. Up to now, however, we none of us seem to agree upon any system, which is a great pity as the work of the Department is continually expanding and growing more and more unwieldly.

I have the honour to be.

Sir,

Your most obedient servant,

Chief Electrical Engineer,

to the Govt:or Mysore,

Encloss.

OFFICE OF THE MUNICIPAL COMMISSION,

City, Bangalore, 30th November 1907

No. 149
Encls Two

Ml 282-07
Sl no 1

From

THE PRESIDENT,

Municipal ~~Commission~~ Council,

Bangalore City

To

The Secretary to the Government of H H the Maharaja of Mysore,

General and Revenue Departments,

Bangalore

Sir,

In submitting herewith copy of a Memo dated the 7th Instant placed before the Municipal Council, pointing out the necessity for the extension of electric lighting to the Basavangudi and Malleswaram Extensions and suburban villages and that of the Council's resolution thereon dated the 21st Idem, agreeing to pay in all a contribution of Rs 20,000/- or ~~Rs~~ 5,000/- in excess of Rs 15,000/- which is now being paid, I have the honor to request that you will be so good as to move the Government to kindly re-consider, in the light of the points urged in the Memo, the order conveyed in Government Proceedings No. 4458-60/Ml.7-06-2 dated the 28th November 1906 on this question and to sanction the introduction of electric lighting to those places as early as practicable

I have the honor to be

Sir,

Your most obedient servant,

M G Krishnaswamy Rao

Vice-PRESIDENT

CR

MEMORANDUM.

When the Municipal Council in 1906 agreed to contribute Rs. 25,000/- yearly towards Electric Lighting, it was under the express understanding that the entire City including the New Extensions, suburban villages Etc., could be provided with lights, doing away with all lights altogether.

But the supply of lights was eventually limited to portions of the City proper only.

2. Thus, the Municipality had still to incur a large expenditure on account of oil-lighting in the Extensions, suburban villages and portions of the old City not provided with electric lights and objection was taken by the Board for payment of Rs. 25,000/- as per original agreement and, after protracted correspondence, Government was pleased to limit the contribution to Rs. 15,000/-.

3. Then, the necessity for the remaining portions of the City and Extensions being provided with electric lights was often urged before Government with the result that a Committee, consisting of the Chief Engineer, the Comptroller and the President of the Municipality was appointed to consider and report on the question.

The Committee proposed the extension of the electric installation to these parts of the City. The Chief Engineer and the Comptroller recommended the levy of an additional contribution of Rs.5000/- from the Municipality. But the President pleaded inability on the part of the Municipality to raise any further payment over and above Rs.15,000/-.

The Government however passed orders that the question of giving electric lights to the Extensions &c., should be dropped pending the increase of Light-

Lighting-Tax & the improvement in Municipal Finance. Thus the question seems to have been sholved and does not appear to have received the consideration it deserved except from a purely financial point of view.

4. There is no denying that the Extensions are rising in importance as the best portions of the City & many persons have either already built costly houses there or are endeavouring to secure sites for constructing decent houses and bungalows.

5. The absence of electric lighting in these localities in fitting with other conveniences and advantages is very keenly felt by the residents.

They feel that they are badly treated at the invidious distinction made by supplying them only with kerosine-oil lights, paying as they do the same rate of lighting-tax as the residents of the City-(VIDE their memorial and the Council's Resolution herein enclosed)

6. The times are also not quite favourable for enhancing the lighting or any other tax in the City on account of the yearly visitation of Plague since 1896, the unseasonable rains and the prevalence of almost famine rates for the past few years except at brief intervals.

It would therefore be hard to put off the supply of electric lights to these Extensions until it is thought proper to increase the Lighting-Tax &c.

6. The Committee referred to above proposed a further contribution of Rs. 8,000/- for extending the electric lighting to the New Extensions & the suburban villages.

At present, the Municipality has been incurring an expenditure of about Rs.3,000/- annually in lighting these parts with oil lamps.

The lighting is being carried on departmentally and as with the strict supervision possible under the existing circumstances, it has not been satisfactory and complaints are now and then received of

(9)
Submitted
& Govt with
this office letter
No 5/2 dated
the 12 September
1907

defective lighting. The sooner the oil lighting system is entirely done away with the better in the interests of both the Municipality and the people.

7. As observed by the Joint Committee, the lighting of Ulsoor with electricity may be deferred for the present, in which case, the additional contribution demanded comes to only Rs. 7,000/-.

Vide Committee decision 171

For the foregoing reasons, it is now proposed for the consideration of the Council the advisability of approaching Government with a request to reconsider their last order and to extend the benefits of electric lighting to the New Extensions and suburban villages &c., on payment of of an additional contribution of Rs. 5,000/- i.e. practically speaking Rs.2000/- in excess of the actual expenditure of Rs.18,000/- (Rs. 15,000/- Electric Lighting Charges plus Rs.3,000/- charges for oil-lamp lighting).

Vide Appendix C

8. The financial condition of the Municipality is not at any rate, as bad as it was sometime ago, and there may not be much difficulty in meeting this extra expenditure.

If the Councillors are agreeable to this proposal Government will be requested to already waive their claim for the balance of Rs. 2,000/-.

(Sd) D Devaraj Urs

Bangalore,
9th Novr: 1907.

President,
Municipal Council, Bangalore City.

Secy to the Govt of His Highness
the Maharaja of Mysore,
Genl and Rev Dept

To The President of
the Bangalore City
Municipal Council

Dated

Despatched 20-1-08

Received

General No. 6912

No Mercl-2

Enclosure No

His letter no Mcy 2
the 30th November 1907
submitting for favourable
consideration a copy of
the Municipal Council's re-
solution agreeing to pay
annually an additional
sum of Rs 5000 for
lighting the whole city,
including the suburbs and
the Extensions except Jnana
Bharathipalya with Electric
Energy -

to the above item the Honorable to request the President to be so good as to clearly define the Ground referred to in the Municipal Council's Resolution by the words "the whole City including the suburbs and the Extensions except Municipality", as it is not clear thereby whether the Municipal Council extends, in return for the additional Assessment now agreed to, light all the Municipal City and Chaumont which are to be replaced by Electric lights besides providing the suburbs and the Extensions with Gas and Electric lights, and whether the new Extension which
